LE QUOC HUY

FUll STACK DEVELOPER

077-489-4626 lehuy9413@gmail.com

PROFESSIONAL SUMMARY

Software engineer specializing in modern web development and cross-platform mobile applications; proficient in ReactJS, NodeJS, React Native, and Flutter. Gained practical experience through a 3-month internship at FPT Software. Experienced in integrating real-time communication, geospatial services, and AI/VLM-powered workflows into real-world products. Committed to writing clean, maintainable code and developing high-performance digital solutions.

EXPERIENCE

FPT Software | Software Engineer Intern (09/2025 – 12/2025)

- Participated in developing and maintaining web/mobile modules using ReactJS/NodeJS, adhering to Agile methodologies.
- Collaborated with senior engineers to implement RESTful APIs, optimize UI components.
- Conducted unit testing, code reviews, and managed Git workflows in an enterprise team environment.

EDUCATION

Software engineer

FPT University

2022 - 2026

KEY PROJECTS & ACHIEVEMENTS

AI-Assisted Emergency Dispatch & Incident Management System

- *Role:* Frontend Developer & AI Engineer
- *Tech stack:* React Native, ReactJS, Express, PostgreSQL, WebSocket, Qwen2.5-VL, Mapbox
- AI Pipeline: Fine-tuned and integrated Qwen2.5-VL to automate hazard classification (#Fire, #Accident, #Traffic_Jam) and 3-tier severity scoring, verified via Weighted Cohen's Kappa.
- Staff Mobile App: Developed field client featuring high-priority audible push alerts, offline caching, and turn-by-turn navigation that bypasses reported traffic congestion.
- Real-time Operations: Synchronized mission lifecycles (En Route, On Scene, Completed) via WebSockets and built digital closure reports with photo evidence.

Smart Parking Building Management System

- *Role:* Full-Stack & Mobile Developer
- *Tech stack:* React Native, ReactJS, NodeJS, Express, MongoDB, Socket.io
- Built a cross-platform mobile app for drivers with automated QR-code check-in, parking slot reservations, and simulated license plate recognition (ALPR).
- Developed a real-time ReactJS dashboard to monitor slot occupancy via WebSockets and automated dynamic parking fee calculations.

Fresh Agriculture E-Commerce Platform (FreshMarket)

- *Role:* Full-Stack Developer
- *Tech stack:* ReactJS, NodeJS, Express, MongoDB, Cloudinary, JWT
- Engineered an online produce marketplace featuring product filtering, shopping cart workflows, and secure Google OAuth 2.0 / JWT authentication.
- Designed RESTful APIs with database indexing for high-integrity order processing and integrated Cloudinary for optimized media storage.

Laboratory Management System

- *Role:* Full-Stack Developer
- *Tech stack:* ReactJS, NodeJS, Express, MongoDB
- Developed an internal reservation platform for workstation scheduling, maintenance tracking, and automated conflict-detection to prevent double bookings.
- Implemented strict Role-Based Access Control (RBAC) separating permissions for students, faculty, and administrators.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL

Frameworks/Libraries: React, React Native

CERTIFICATIONS & TRAINING

- **Full Stack Web Development**

https://coursera.org/share/c28775db10102bb5b8c0504bd536ff68

- **Application Development**

https://coursera.org/share/c28775db10102bb5b8c0504bd536ff68

- **Amazon Junior Software Developer**
